

## Interfaith Green Building Post-Conference Evaluation Form

This evaluation form is intended to help the conference organizers determine the effectiveness of the event. Your response is important because it will be used to determine the future of the Interfaith Green Building initiative.

The Goals of the conference are/were:

- To suggest Faith-based organizations can lead the way.
- To suggest ways your organization can be the initial gravitational center that forms a star that gives off light. To *motivate* and *inspire our varied faith-based denominations to act* by offering perspectives and actual examples.
- To provide *know-how* about the *planning and methods* employed to reduce GHG emissions. All aspects need to be considered—not just your building, but also your grounds, water use, waste generation, etc.
- To present different methods available and actual examples used to *finance* projects—to address the “We can’t afford it!” response.
- To *illustrate that we’re all in this together*, moving along the spectrum toward zero GHG emissions. It takes motivation, understanding of possible solutions, thoughtful planning and creativity.
